
Team Lunch - CareemNow

Problem Solving

- Company Sets up a cart for employees to schedule repeat orders
 - Employees can create teams to order food
-

Architecture

- PHP Laravel to serve API with JWT Token
 - React Frontend with Material UI & Redux
 - Queues to handle dispatch to CareemNow
-

Demo

Scalability

- Distributed Deployment over AWS with AutoScaling Groups and Load Balancers
 - Quick Process to launch on new cities
-

Future Vision

- Integrate Payments with Careem Pay
 - Split payments like Venmo/Splitwise
-
